

PALLET DOCTOR STRINGER SIZER

Model M20S

BENEFITS

- Planes Stringer to Uniform Height
- Eliminates Sorting of Stringers
- Increases Production of Re-Manufacturing Pallets

The Pallet Doctor Stringer Sizer machines are designed specifically for pallet recycling. The Sizer utilizes a special nail cutting cutter head to easily cut through both the stringers and nails to provide a consistent, high quality product.

PRS Model HF is a stand-alone unit designed for operations that utilize band saw dismantlers. Model M20S sizes and unstubs stringers in one operation and fits both rotary and bandsaw operations.
