

BUILT-WELL SINGLE HEAD NOTCHER

BENEFITS

- Notches 3 recycled or new stringers per cycle
- Automatic clamping, notch, and unclamping cycles
- Safe operation using double palm buttons and a remote console
- Fast, simple changeover

20 hp recommended for recycled stringers

We know that the single head notcher is central to any pallet operation. Our BUILT-WELL Single Head Notchers were designed to be productive, safe, and dependable. These versatile machines notch 3 stringers at once and change over quickly to an infinite amount of different configurations. Plus, the operator is kept out of harms way with advanced guarding, stringer clamping, and a remote double palm button control system.

Our BUILT-WELL Single Head Notcher comes equipped with pneumatically actuated clamping and carriage functions, 3 phase electrical (prewired to your voltage requirement), and an air filter and regulator.
